8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.31
9. Total Well Depth (fbgs) 30
10. Screened interval/open hole (fbgs) 20 - 30
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 09/10/21 Time: 11:16
15. Depth to Ground Water Depth to ground water at time of deployment: 14.97
16. Date and Time of Retrieval Date: 09/27/21 Time: 11:52
17. Depth to Ground Water Depth to ground water at time of retrieval: 17.69
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
27.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/11/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]

    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
17.25			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/05/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 22.8 Wind: 10.4/NW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 26.1 Wind: 17.3/SW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-304C
4. Well Permit Number: E201510846
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.28
9. Total Well Depth (fbgs) 90
10. Screened interval/open hole (fbgs) 70 - 90
11. Well Casing: Diameter: 4 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 4 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 09/10/21 Time: 09:04
15. Depth to Ground Water Depth to ground water at time of deployment: 6.21
16. Date and Time of Retrieval Date: 09/27/21 Time: 10:16
17. Depth to Ground Water Depth to ground water at time of retrieval: 7.05
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
73.25			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: #Error
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 18.9 Wind: 11.5/NW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 20.6 Wind: 9.2/WSW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☒ **No**, this well is being profiled during this sampling round
   ☐ **Yes**, this well was profiled already. Date when well was profiled: #Error

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____
   Measurements taken every _____ feet
   [Please Attach Results]

26. Weather Conditions During Deployment Temp: 25.0 Wind: 10.4/S ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 26.1 Wind: 11.5/S ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

28. Field Sampling Technician: Name(s) and Company (please print clearly)

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-353C
4. Well Permit Number: E201501299
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.45

9. Total Well Depth (fbgs) 130
10. Screened interval/open hole (fbgs) 120 - 130
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01

14. Date and Time of Deployment Date: 09/08/21 Time: 11:00
15. Depth to Ground Water Depth to ground water at time of deployment: 41.84
16. Date and Time of Retrieval Date: 09/22/21 Time: 12:15
17. Depth to Ground Water Depth to ground water at time of retrieval: 45.22
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)

20. Type of PDBS Used
   ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
   ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)

21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____

22. Position of PDBS Weight Bottom of line-suspended

23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
125			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/03/14

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____
   Measurements taken every _____ feet

7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.37
9. Total Well Depth (fbgs) 118
10. Screened interval/open hole (fbgs) 108 - 118
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 09/17/21 Time: 09:31
15. Depth to Ground Water Depth to ground water at time of deployment: 39.68
16. Date and Time of Retrieval Date: 10/20/21 Time: 09:25
17. Depth to Ground Water Depth to ground water at time of retrieval: 41.49
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2021-09-17

17. Depth to Ground Water Depth to ground water at time of retrieval: 43.8
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)

20. Type of PDBS Used
   ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
   ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)

21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____

22. Position of PDBS Weight Bottom of line-suspended

23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
126.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 04/08/15

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____
   Measurements taken every _____ feet
   [Please Attach Results]

26. Weather Conditions During Deployment Temp: 27.8 Wind: 16.1/SSE ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 27.2 Wind: 16.1/SSE ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-377C
4. Well Permit Number: E201500787
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.35

9. Total Well Depth (fbgs) 118
10. Screened interval/open hole (fbgs) 108 - 118
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02

14. Date and Time of Deployment Date: 09/03/21 Time: 14:10
15. Depth to Ground Water Depth to ground water at time of deployment: 44.25
16. Date and Time of Retrieval Date: 09/20/21 Time: 14:07
17. Depth to Ground Water Depth to ground water at time of retrieval: 47.02
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)

20. Type of PDBS Used
   ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
   ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)

21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____

22. Position of PDBS Weight Bottom of line-suspended

23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
109.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 04/09/15

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____
   Measurements taken every _____ feet
   [Please Attach Results]

26. Weather Conditions During Deployment Temp: 22.2 Wind: 9.2/NW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 22.8 Wind: 8.1/S ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing

28. Field Sampling Technician: Name(s) and Company (please print clearly)

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-483B
4. Well Permit Number: E201511555
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.26
9. Total Well Depth (fbgs) 60
10. Screened interval/open hole (fbgs) 50 - 60
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 09/07/21 Time: 10:18
15. Depth to Ground Water Depth to ground water at time of deployment: 5.87
16. Date and Time of Retrieval Date: 09/21/21 Time: 10:32
17. Depth to Ground Water Depth to ground water at time of retrieval: 5.87
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS

6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.38
9. Total Well Depth (fbgs) 15.8
10. Screened interval/open hole (fbgs) 7.8 - 15.8
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 01/01/01 Time: _____
15. Depth to Ground Water Depth to ground water at time of deployment: _____
16. Date and Time of Retrieval Date: 05/31/22 Time: 14:31
17. Depth to Ground Water Depth to ground water at time of retrieval: 8.99
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
17.25			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/17/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: _____ Wind: _____ ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 33.9 Wind: 8.1/NW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing

18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
277.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/04/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 12.2 Wind: 6.9/ENE ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 32.2 Wind: 11.5/NNW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-7A
4. Well Permit Number: E201411635
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.36
9. Total Well Depth (fbgs) 127
10. Screened interval/open hole (fbgs) 112 - 127
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 05/05/22 Time: 09:45
15. Depth to Ground Water Depth to ground water at time of deployment: 18.24
16. Date and Time of Retrieval Date: 06/02/22 Time: 08:45
17. Depth to Ground Water Depth to ground water at time of retrieval: 17.69
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
124.55			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 01/02/15
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 17.8 Wind: 5.8/NNW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.36
9. Total Well Depth (fbgs) 95.1
10. Screened interval/open hole (fbgs) 85.1 - 95.1
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 05/06/22 Time: 11:45
15. Depth to Ground Water Depth to ground water at time of deployment: 18.71
16. Date and Time of Retrieval Date: 06/06/22 Time: 12:50
17. Depth to Ground Water Depth to ground water at time of retrieval: 18.27
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
92.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/24/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 13.9 Wind: 0.0/N ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing

18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
217.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/05/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 16.1 Wind: 8.1/E ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 18.3 Wind: 4.6/ESE ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-28B
4. Well Permit Number: E201402668
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.38

9. Total Well Depth (fbgs) 321
10. Screened interval/open hole (fbgs) 306 - 321
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 05/02/22 Time: 13:05
15. Depth to Ground Water Depth to ground water at time of deployment: 51.02
16. Date and Time of Retrieval Date: 05/31/22 Time: 15:00
17. Depth to Ground Water Depth to ground water at time of retrieval: 52.04
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
308.55			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/04/14

5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.44
9. Total Well Depth (fbgs) 161.26
10. Screened interval/open hole (fbgs) 151.26 - 161.26
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 05/03/22 Time: 12:35
15. Depth to Ground Water Depth to ground water at time of deployment: 12.03
16. Date and Time of Retrieval Date: 06/01/22 Time: 15:20
17. Depth to Ground Water Depth to ground water at time of retrieval: 11.52
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
152.55			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/18/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]

14. Date and Time of Deployment Date: 05/04/22 Time: 10:10
15. Depth to Ground Water Depth to ground water at time of deployment: 58.98
16. Date and Time of Retrieval Date: 06/02/22 Time: 10:42
17. Depth to Ground Water Depth to ground water at time of retrieval: 58.75
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
293.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/17/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 10.6 Wind: 4.6/E ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 23.3 Wind: 4.6/SW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 01/28/15
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 13.3 Wind: 6.9/E ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 26.1 Wind: 11.5/S ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-58A
4. Well Permit Number: E201413476
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.36
9. Total Well Depth (fbgs) 240
10. Screened interval/open hole (fbgs) 215 - 240
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 05/06/22 Time: 10:10
15. Depth to Ground Water Depth to ground water at time of deployment: 40.4
16. Date and Time of Retrieval Date: 06/06/22 Time: 15:24
17. Depth to Ground Water Depth to ground water at time of retrieval: 40.11
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
217.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 04/07/15
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well

5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.39
9. Total Well Depth (fbgs) 106.9
10. Screened interval/open hole (fbgs) 81.9 - 106.9
11. Well Casing: Diameter: 6 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 6 Material: ☐ PVC ☐ Carbon Steel ☐ Stainless Steel

18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
41.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: #Error
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 13.9 Wind: 6.9/SE ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 26.7 Wind: 13.8/S ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-46
4. Well Permit Number: 2600060830
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.43
9. Total Well Depth (fbgs) 62
10. Screened interval/open hole (fbgs) 38 - 62
11. Well Casing: Diameter: 6 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 6 Material: ☐ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: N/A
14. Date and Time of Deployment Date: 05/04/22 Time: 08:20
15. Depth to Ground Water Depth to ground water at time of deployment: 47.49
16. Date and Time of Retrieval Date: 06/06/22 Time: 07:30
17. Depth to Ground Water Depth to ground water at time of retrieval: 47.64
18. Type of Deployment Line Used Diameter: 3/64" Material: Teflon Lined
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
59.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/30/04
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 10.6 Wind: 5.8/SE ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 18.3 Wind: 0.0/N ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.41
9. Total Well Depth (fbgs) 40
10. Screened interval/open hole (fbgs) 30 - 40
11. Well Casing: Diameter: 6 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 6 Material: ☐ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: N/A
14. Date and Time of Deployment Date: 05/05/22 Time: 12:15
15. Depth to Ground Water Depth to ground water at time of deployment: 2.09
16. Date and Time of Retrieval Date: 06/06/22 Time: 09:45
17. Depth to Ground Water Depth to ground water at time of retrieval: 1.97
18. Type of Deployment Line Used Diameter: 3/64" Material: Teflon Lined
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
36.75			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/05/16
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 18.9 Wind: 0.0/N ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 22.8 Wind: 3.5/N ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
72.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/04/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: _____ Wind: _____ ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 30.0 Wind: 17.3/NNW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-117
4. Well Permit Number: E201311393
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.37
9. Total Well Depth (fbgs) 80
10. Screened interval/open hole (fbgs) 60 - 80
11. Well Casing: Diameter: 4 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 4 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 05/06/22 Time: 14:20
15. Depth to Ground Water Depth to ground water at time of deployment: 8.07
16. Date and Time of Retrieval Date: 06/03/22 Time: 14:37
17. Depth to Ground Water Depth to ground water at time of retrieval: 3.39
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-126C
4. Well Permit Number: E201405729
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.29

9. Total Well Depth (fbgs) 80
10. Screened interval/open hole (fbgs) 70 - 80
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02

14. Date and Time of Deployment Date: 05/03/22 Time: 11:00
15. Depth to Ground Water Depth to ground water at time of deployment: 4.93
16. Date and Time of Retrieval Date: 06/01/22 Time: 14:20
17. Depth to Ground Water Depth to ground water at time of retrieval: 4.78
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)

20. Type of PDBS Used
   ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
   ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)

21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____

22. Position of PDBS Weight Bottom of line-suspended

23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
77.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/10/14

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____
   Measurements taken every _____ feet
   [Please Attach Results]

26. Weather Conditions During Deployment Temp: 15.0 Wind: 5.8/N ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 22.8 Wind: 10.4/SE ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing

28. Field Sampling Technician: Name(s) and Company (please print clearly)

16. Date and Time of Retrieval Date: 06/02/22 Time: 15:43
17. Depth to Ground Water Depth to ground water at time of retrieval: 9999
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
45.75			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/08/15
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 22.8 Wind: 8.1/E ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 23.9 Wind: 4.6/NNE ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing

6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.37

9. Total Well Depth (fbgs) 100
10. Screened interval/open hole (fbgs) 90 - 100
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02

14. Date and Time of Deployment Date: 05/05/22 Time: 16:50
15. Depth to Ground Water Depth to ground water at time of deployment: 12.28
16. Date and Time of Retrieval Date: 06/02/22 Time: 15:51
17. Depth to Ground Water Depth to ground water at time of retrieval: 11.8
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)

20. Type of PDBS Used
   ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-146C
4. Well Permit Number: E201306326
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.58

9. Total Well Depth (fbgs) 80
10. Screened interval/open hole (fbgs) 60 - 80
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02

14. Date and Time of Deployment Date: 05/05/22 Time: 14:55
15. Depth to Ground Water Depth to ground water at time of deployment: 33.43
16. Date and Time of Retrieval Date: 06/06/22 Time: 11:25
17. Depth to Ground Water Depth to ground water at time of retrieval: 33.73
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)

20. Type of PDBS Used
   ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
   ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)

21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____

22. Position of PDBS Weight Bottom of line-suspended

23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
67.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/30/13

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.31
9. Total Well Depth (fbgs) 35
10. Screened interval/open hole (fbgs) 25 - 35
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 05/04/22 Time: 11:30
15. Depth to Ground Water Depth to ground water at time of deployment: 14.91
16. Date and Time of Retrieval Date: 06/03/22 Time: 11:37
17. Depth to Ground Water Depth to ground water at time of retrieval: 14.76
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
27.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/30/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 11.7 Wind: 0.0/N ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 22.2 Wind: 4.6/E ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing

20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
22.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/18/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 16.1 Wind: 6.9/NNE ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 21.7 Wind: 0.0/N ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-201B
4. Well Permit Number: E201411640
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.32

9. Total Well Depth (fbgs) 50
10. Screened interval/open hole (fbgs) 40 - 50
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02

14. Date and Time of Deployment Date: 05/05/22 Time: 09:20
15. Depth to Ground Water Depth to ground water at time of deployment: 9.34
16. Date and Time of Retrieval Date: 06/02/22 Time: 08:54
17. Depth to Ground Water Depth to ground water at time of retrieval: 8.64
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)

20. Type of PDBS Used
   ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
   ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)

21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____

22. Position of PDBS Weight Bottom of line-suspended

23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
42.55			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 01/02/15

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____
   Measurements taken every _____ feet

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-207B
4. Well Permit Number: E201304516
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.35
9. Total Well Depth (fbgs) 48
10. Screened interval/open hole (fbgs) 38 - 48
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 05/03/22 Time: 08:50
15. Depth to Ground Water Depth to ground water at time of deployment: 6.73
16. Date and Time of Retrieval Date: 06/01/22 Time: 12:20
17. Depth to Ground Water Depth to ground water at time of retrieval: 6.8
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
45.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/17/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 15.0 Wind: 5.8/N ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 19.4 Wind: 6.9/E ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

14. Date and Time of Deployment Date: 05/04/22 Time: 15:55
15. Depth to Ground Water Depth to ground water at time of deployment: 18.28
16. Date and Time of Retrieval Date: 06/03/22 Time: 13:35
17. Depth to Ground Water Depth to ground water at time of retrieval: 18.21
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
42.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/01/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 17.2 Wind: 4.6/N ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 23.3 Wind: 4.6/N ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/08/13

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____
   Measurements taken every _____ feet
   [Please Attach Results]

26. Weather Conditions During Deployment Temp: 14.4 Wind: 10.4/N ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 23.3 Wind: 4.6/N ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing

28. Field Sampling Technician: Name(s) and Company (please print clearly)

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-236C
4. Well Permit Number: E201312197
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.45
9. Total Well Depth (fbgs) 57
10. Screened interval/open hole (fbgs) 47 - 57
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 05/05/22 Time: 08:10
15. Depth to Ground Water Depth to ground water at time of deployment: 11.31
16. Date and Time of Retrieval Date: 06/03/22 Time: 13:20
17. Depth to Ground Water Depth to ground water at time of retrieval: 11.03
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
55.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/08/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____

7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.34
9. Total Well Depth (fbgs) 50
10. Screened interval/open hole (fbgs) 40 - 50
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 05/05/22 Time: 11:55
15. Depth to Ground Water Depth to ground water at time of deployment: 14.18
16. Date and Time of Retrieval Date: 06/03/22 Time: 12:10
17. Depth to Ground Water Depth to ground water at time of retrieval: 13.97
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
47.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 12/11/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 18.9 Wind: 0.0/N ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 22.2 Wind: 5.8/ESE ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
92.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/05/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 11.7 Wind: 5.8/N ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 31.1 Wind: 10.4/NNW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-269C
4. Well Permit Number: E201401594
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.42
9. Total Well Depth (fbgs) 125
10. Screened interval/open hole (fbgs) 115 - 125
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 05/04/22 Time: 09:35
15. Depth to Ground Water Depth to ground water at time of deployment: 51.22
16. Date and Time of Retrieval Date: 06/06/22 Time: 08:30
17. Depth to Ground Water Depth to ground water at time of retrieval: 51.5
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
122.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/06/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 10.6 Wind: 4.6/E ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 20.6 Wind: 0.0/N ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

9. Total Well Depth (fbgs) 51.47
10. Screened interval/open hole (fbgs) 41.47 - 51.47
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 05/03/22 Time: 12:45
15. Depth to Ground Water Depth to ground water at time of deployment: 5.2
16. Date and Time of Retrieval Date: 05/31/22 Time: 14:55
17. Depth to Ground Water Depth to ground water at time of retrieval: 4.93
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
42.55			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/09/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 16.1 Wind: 6.9/N ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 33.9 Wind: 8.1/NW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
27.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/11/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 10.6 Wind: 3.5/N ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 23.3 Wind: 4.6/SW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-276B
4. Well Permit Number: E201403621
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.35
9. Total Well Depth (fbgs) 55
10. Screened interval/open hole (fbgs) 45 - 55
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 05/04/22 Time: 10:25
15. Depth to Ground Water Depth to ground water at time of deployment: 17.86
16. Date and Time of Retrieval Date: 06/02/22 Time: 11:10
17. Depth to Ground Water Depth to ground water at time of retrieval: 16.86
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS

4. Well Permit Number: E201510844
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.38
9. Total Well Depth (fbgs) 20
10. Screened interval/open hole (fbgs) 10 - 20
11. Well Casing: Diameter: 4 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 4 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 05/04/22 Time: 11:40

17. Depth to Ground Water Depth to ground water at time of retrieval: 16.28
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)

20. Type of PDBS Used
   ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
   ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)

21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____

22. Position of PDBS Weight Bottom of line-suspended

23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
62.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/09/14

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____
   Measurements taken every _____ feet
   [Please Attach Results]

26. Weather Conditions During Deployment Temp: 14.4 Wind: 6.9/E ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 23.9 Wind: 4.6/NNE ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-375A
4. Well Permit Number: E201414287
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.44
9. Total Well Depth (fbgs) 54
10. Screened interval/open hole (fbgs) 34 - 54
11. Well Casing: Diameter: 6 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 6 Material: ☐ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: N/A
14. Date and Time of Deployment Date: 05/02/22 Time: 12:50
15. Depth to Ground Water Depth to ground water at time of deployment: 28.09
16. Date and Time of Retrieval Date: 06/01/22 Time: 11:23
17. Depth to Ground Water Depth to ground water at time of retrieval: 27.26
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
51.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 04/08/15
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 12.2 Wind: 8.1/ENE ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 19.4 Wind: 6.9/E ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) -6.35
9. Total Well Depth (fbgs) 25
10. Screened interval/open hole (fbgs) 10 - 25
11. Well Casing: Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 05/02/22 Time: 11:35
15. Depth to Ground Water Depth to ground water at time of deployment: 17.71
16. Date and Time of Retrieval Date: 06/01/22 Time: 10:50
17. Depth to Ground Water Depth to ground water at time of retrieval: 17
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
18.25			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 02/18/15
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: 138RI-MW1R
4. Well Permit Number: E202010338
5. Type of Well: ☒ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☐ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.36
9. Total Well Depth (fbgs) 32
10. Screened interval/open hole (fbgs) 22 - 32
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 03/16/23 Time: 12:58
15. Depth to Ground Water Depth to ground water at time of deployment: 6.22
16. Date and Time of Retrieval Date: 04/18/23 Time: 08:32
17. Depth to Ground Water Depth to ground water at time of retrieval: 6.36
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/10 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2023-03-16
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
25.25			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 11/13/20
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 9.4 Wind: 9.2/NW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 10.6 Wind: 19.6/W ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.45
9. Total Well Depth (fbgs) 142
10. Screened interval/open hole (fbgs) 117 - 142
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 03/20/23 Time: 10:57
15. Depth to Ground Water Depth to ground water at time of deployment: 40.86
16. Date and Time of Retrieval Date: 04/19/23 Time: 10:45
17. Depth to Ground Water Depth to ground water at time of retrieval: 41.54
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2023-03-20
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
139.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/30/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet

18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/40 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2023-03-17
22. Position of PDBS Weight In-line and Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
342.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/24/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/24/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 3.9 Wind: 6.9/N ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 11.1 Wind: 11.5/NW ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-12A
4. Well Permit Number: E201300227
5. Type of Well: ☒ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☐ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.5
9. Total Well Depth (fbgs) 134
10. Screened interval/open hole (fbgs) 124 - 134
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 03/16/23 Time: 09:40
15. Depth to Ground Water Depth to ground water at time of deployment: 16.32
16. Date and Time of Retrieval Date: 04/17/23 Time: 10:25
17. Depth to Ground Water Depth to ground water at time of retrieval: 17.51
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2023-03-16
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
131.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 04/24/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-16C
4. Well Permit Number: E201301078
5. Type of Well: ☒ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☐ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.36
9. Total Well Depth (fbgs) 444.4
10. Screened interval/open hole (fbgs) 419.4 - 444.4
11. Well Casing: Diameter: 4 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 4 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 03/16/23 Time: 14:02
15. Depth to Ground Water Depth to ground water at time of deployment: 0.18
16. Date and Time of Retrieval Date: 04/18/23 Time: 11:00
17. Depth to Ground Water Depth to ground water at time of retrieval: 0.11
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2023-03-16
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
435.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/05/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 10.6 Wind: 10.4/W ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 10.6 Wind: 18.4/WSW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.76
9. Total Well Depth (fbgs) 300
10. Screened interval/open hole (fbgs) 275 - 300
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 03/13/23 Time: 15:30
15. Depth to Ground Water Depth to ground water at time of deployment: 39.03
16. Date and Time of Retrieval Date: 04/12/23 Time: 14:12
17. Depth to Ground Water Depth to ground water at time of retrieval: 39.79
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/40 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2023-03-13
22. Position of PDBS Weight In-line and Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
287.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 03/21/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet

20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2023-03-16
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
276.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/18/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 11.7 Wind: 6.9/W ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 10.0 Wind: 15.0/W ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/10/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 6.1 Wind: 21.9/NNW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 13.9 Wind: 4.6/N ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-40A
4. Well Permit Number: E201402658
5. Type of Well: ☒ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☐ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.58
9. Total Well Depth (fbgs) 147
10. Screened interval/open hole (fbgs) 137 - 147
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 03/15/23 Time: 09:36
15. Depth to Ground Water Depth to ground water at time of deployment: 6.48
16. Date and Time of Retrieval Date: 04/14/23 Time: 09:24
17. Depth to Ground Water Depth to ground water at time of retrieval: 6.65
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2023-03-15
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
139.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/06/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-64A
4. Well Permit Number: E201500412
5. Type of Well: ☒ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☐ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.36
9. Total Well Depth (fbgs) 250
10. Screened interval/open hole (fbgs) 235 - 250
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 03/17/23 Time: 09:28
15. Depth to Ground Water Depth to ground water at time of deployment: 8.9
16. Date and Time of Retrieval Date: 04/19/23 Time: 09:17
17. Depth to Ground Water Depth to ground water at time of retrieval: 50.69
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/40 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2023-03-17
22. Position of PDBS Weight In-line and Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
237.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/03/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 7.8 Wind: 8.1/SW ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 8.9 Wind: 8.1/WNW ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-24
4. Well Permit Number: 2600036932
5. Type of Well: ☒ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☐ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) -5.7
9. Total Well Depth (fbgs) 41.7
10. Screened interval/open hole (fbgs) 31.7 - 41.7
11. Well Casing: Diameter: 6 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 6 Material: ☐ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: N/A
14. Date and Time of Deployment Date: 03/13/23 Time: 15:10
15. Depth to Ground Water Depth to ground water at time of deployment: 16.09
16. Date and Time of Retrieval Date: 04/12/23 Time: 11:02
17. Depth to Ground Water Depth to ground water at time of retrieval: 17.42
18. Type of Deployment Line Used Diameter: 3/64" Material: Teflon Lined
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 12 Diameter: 1.75 Filled 2023-03-13
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-58
4. Well Permit Number: 2600068227
5. Type of Well: ☒ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☐ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.56
9. Total Well Depth (fbgs) 36
10. Screened interval/open hole (fbgs) 21 - 36
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 03/13/23 Time: 11:10
15. Depth to Ground Water Depth to ground water at time of deployment: 16.34
16. Date and Time of Retrieval Date: 04/12/23 Time: 07:36
17. Depth to Ground Water Depth to ground water at time of retrieval: 17.76
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2023-03-13
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
32.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 01/15/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 5.0 Wind: 8.1/ENE ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 18.3 Wind: 6.9/W ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.65
9. Total Well Depth (fbgs) 34
10. Screened interval/open hole (fbgs) 24 - 34
11. Well Casing: Diameter: 6 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 6 Material: ☐ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: N/A
14. Date and Time of Deployment Date: 03/15/23 Time: 11:37
15. Depth to Ground Water Depth to ground water at time of deployment: 0.11
16. Date and Time of Retrieval Date: 04/14/23 Time: 11:18
17. Depth to Ground Water Depth to ground water at time of retrieval: 0.45
18. Type of Deployment Line Used Diameter: 3/64" Material: Teflon Lined
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2023-03-15
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
31.95			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 03/27/09
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-136B
4. Well Permit Number: E201416041
5. Type of Well: ☒ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☐ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.57
9. Total Well Depth (fbgs) 50
10. Screened interval/open hole (fbgs) 40 - 50
11. Well Casing: Diameter: 6 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 6 Material: ☐ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: N/A
14. Date and Time of Deployment Date: 03/16/23 Time: 08:49
15. Depth to Ground Water Depth to ground water at time of deployment: 10.11
16. Date and Time of Retrieval Date: 04/17/23 Time: 09:02
17. Depth to Ground Water Depth to ground water at time of retrieval: 10.74
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2023-03-16
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
45.75			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/08/15
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.61
9. Total Well Depth (fbgs) 57
10. Screened interval/open hole (fbgs) 42 - 57
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 01/02/15
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 6.7 Wind: 0.0/N ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 8.9 Wind: 8.1/WNW ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-204C
4. Well Permit Number: E201304823
5. Type of Well: ☒ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☐ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.35
9. Total Well Depth (fbgs) 76.5
10. Screened interval/open hole (fbgs) 56.5 - 76.5
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 03/21/23 Time: 08:48
15. Depth to Ground Water Depth to ground water at time of deployment: 14.32
16. Date and Time of Retrieval Date: 04/18/23 Time: 14:59
17. Depth to Ground Water Depth to ground water at time of retrieval: 15.35
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2023-03-21
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
62.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/18/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]

6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.42
9. Total Well Depth (fbgs) 40
10. Screened interval/open hole (fbgs) 30 - 40
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 12/20/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 5.6 Wind: 6.9/E ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: _____ Wind: _____ ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-237C
4. Well Permit Number: E201315220
5. Type of Well: ☒ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☐ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.32
9. Total Well Depth (fbgs) 120
10. Screened interval/open hole (fbgs) 110 - 120
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 03/13/23 Time: 11:25
15. Depth to Ground Water Depth to ground water at time of deployment: 27.85
16. Date and Time of Retrieval Date: 04/12/23 Time: 07:56
17. Depth to Ground Water Depth to ground water at time of retrieval: 28.33
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2023-03-13
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
112.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 03/24/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____

6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.37
9. Total Well Depth (fbgs) 45
10. Screened interval/open hole (fbgs) 35 - 45
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 03/16/23 Time: 13:20
15. Depth to Ground Water Depth to ground water at time of deployment: 4.53
16. Date and Time of Retrieval Date: 04/18/23 Time: 09:40
17. Depth to Ground Water Depth to ground water at time of retrieval: 4.91
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/10 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2023-03-16
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
43.25			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 11/13/20
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-276A
4. Well Permit Number: E201403620
5. Type of Well: ☒ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☐ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.31
9. Total Well Depth (fbgs) 30
10. Screened interval/open hole (fbgs) 20 - 30
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 03/15/23 Time: 14:27
15. Depth to Ground Water Depth to ground water at time of deployment: 16.47
16. Date and Time of Retrieval Date: 04/17/23 Time: 13:42
17. Depth to Ground Water Depth to ground water at time of retrieval: 19.66
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2023-03-15
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
27.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/11/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 6.1 Wind: 21.9/NNW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 13.9 Wind: 10.4/W ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.38
9. Total Well Depth (fbgs) 20
10. Screened interval/open hole (fbgs) 10 - 20

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-373C
4. Well Permit Number: E201502843
5. Type of Well: ☒ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☐ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.37
9. Total Well Depth (fbgs) 118
10. Screened interval/open hole (fbgs) 108 - 118
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 03/14/23 Time: 11:30
15. Depth to Ground Water Depth to ground water at time of deployment: 39.59
16. Date and Time of Retrieval Date: 04/13/23 Time: 11:02
17. Depth to Ground Water Depth to ground water at time of retrieval: 40.98
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2023-03-14
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
115.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 04/10/15
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?

6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.35
9. Total Well Depth (fbgs) 118
10. Screened interval/open hole (fbgs) 108 - 118
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: #Error
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 13.9 Wind: 6.9/ESE ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 7.2 Wind: 9.2/SW ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

Groundwater Sampling Sheets – 1Q 2024

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: 66RI-MW4
4. Well Permit Number: E201304931
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.3
9. Total Well Depth (fbgs) 15.4
10. Screened interval/open hole (fbgs) 8.4 - 15.4
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 02/29/24 Time: 09:04
15. Depth to Ground Water Depth to ground water at time of deployment: 8.41
16. Date and Time of Retrieval Date: 03/28/24 Time: 09:16
17. Depth to Ground Water Depth to ground water at time of retrieval: 8.27
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2024-02-29
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
7.75			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/18/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 0 Wind: 15.0/WNW ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 8.9 Wind: 3.5/WNW ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-3-D2
4. Well Permit Number: E201402663
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.36
9. Total Well Depth (fbgs) 300
10. Screened interval/open hole (fbgs) 275 - 300
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 03/04/24 Time: 14:58
15. Depth to Ground Water Depth to ground water at time of deployment: 89.4
16. Date and Time of Retrieval Date: 04/01/24 Time: 10:58
17. Depth to Ground Water Depth to ground water at time of retrieval: 79.1
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2024-03-04
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
287.55			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/03/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 13.3 Wind: 11.5/ESE ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 8.9 Wind: 3.5/NE ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-16C
4. Well Permit Number: E201301078
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.36
9. Total Well Depth (fbgs) 444.4
10. Screened interval/open hole (fbgs) 419.4 - 444.4
11. Well Casing: Diameter: 4 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 4 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 02/29/24 Time: 11:00
15. Depth to Ground Water Depth to ground water at time of deployment: 0
16. Date and Time of Retrieval Date: 03/28/24 Time: 11:50
17. Depth to Ground Water Depth to ground water at time of retrieval: 0.02
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2024-02-29
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
435.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/05/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____

7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.76
9. Total Well Depth (fbgs) 300
10. Screened interval/open hole (fbgs) 275 - 300
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 02/26/24 Time: 13:45
15. Depth to Ground Water Depth to ground water at time of deployment: 46.33
16. Date and Time of Retrieval Date: 03/25/24 Time: 13:47
17. Depth to Ground Water Depth to ground water at time of retrieval: 44.35
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/40 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2024-02-26
22. Position of PDBS Weight In-line and Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: IW-168B
4. Well Permit Number: E201507919
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.21
9. Total Well Depth (fbgs) 56.7
10. Screened interval/open hole (fbgs) 31.7 - 56.7
11. Well Casing: Diameter: 6 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 6 Material: ☐ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: N/A
14. Date and Time of Deployment Date: 03/01/24 Time: 13:33
15. Depth to Ground Water Depth to ground water at time of deployment: 9.3
16. Date and Time of Retrieval Date: 04/01/24 Time: 12:40
17. Depth to Ground Water Depth to ground water at time of retrieval: 8.78
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/10 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2024-03-01
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
44.25			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☒ **No**, this well is being profiled during this sampling round
    ☐ **Yes**, this well was profiled already. Date when well was profiled: #Error
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-105A
4. Well Permit Number: P200804389
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.4
9. Total Well Depth (fbgs) 12
10. Screened interval/open hole (fbgs) 7 - 12
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 02/27/24 Time: 11:30
15. Depth to Ground Water Depth to ground water at time of deployment: 1.28
16. Date and Time of Retrieval Date: 03/27/24 Time: 10:45
17. Depth to Ground Water Depth to ground water at time of retrieval: 0.66
18. Type of Deployment Line Used Diameter: 3/64" Material: Teflon Lined
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2024-02-27
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
8.65			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/01/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 9.4 Wind: 4.6/ESE ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 10.6 Wind: 0.0/N ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-143C
4. Well Permit Number: E201412330
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.53
9. Total Well Depth (fbgs) 85
10. Screened interval/open hole (fbgs) 75 - 85
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 02/27/24 Time: 14:35
15. Depth to Ground Water Depth to ground water at time of deployment: 14.03
16. Date and Time of Retrieval Date: 03/26/24 Time: 14:15
17. Depth to Ground Water Depth to ground water at time of retrieval: 12.15
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2024-02-27
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
77.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 12/11/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 11.7 Wind: 6.9/SSE ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 9.4 Wind: 8.1/SE ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.35
9. Total Well Depth (fbgs) 17
10. Screened interval/open hole (fbgs) 7 - 17
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-207B
4. Well Permit Number: E201304516
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.35
9. Total Well Depth (fbgs) 48
10. Screened interval/open hole (fbgs) 38 - 48
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 02/28/24 Time: 11:03
15. Depth to Ground Water Depth to ground water at time of deployment: 6.77
16. Date and Time of Retrieval Date: 03/27/24 Time: 13:25
17. Depth to Ground Water Depth to ground water at time of retrieval: 5.03
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2024-02-28
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
45.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/17/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 12.8 Wind: 9.2/SSE ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 9.4 Wind: 0.0/N ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.36
9. Total Well Depth (fbgs) 50
10. Screened interval/open hole (fbgs) 40 - 50
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 02/29/24 Time: 13:38
15. Depth to Ground Water Depth to ground water at time of deployment: 18.19
16. Date and Time of Retrieval Date: 04/02/24 Time: 09:39
17. Depth to Ground Water Depth to ground water at time of retrieval: 17.08
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2024-02-29
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
42.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/01/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 3.9 Wind: 13.8/NW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 7.8 Wind: 10.4/ENE ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-258C
4. Well Permit Number: E201314458
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.32

9. Total Well Depth (fbgs) 130
10. Screened interval/open hole (fbgs) 105 - 130
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02

14. Date and Time of Deployment Date: 03/04/24 Time: 09:22
15. Depth to Ground Water Depth to ground water at time of deployment: 59.98
16. Date and Time of Retrieval Date: 03/29/24 Time: 11:57
17. Depth to Ground Water Depth to ground water at time of retrieval: 56.13
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)

20. Type of PDBS Used
   ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
   ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)

21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2024-03-04

22. Position of PDBS Weight Bottom of line-suspended

23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
107.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 12/11/13

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____
   Measurements taken every _____ feet
   [Please Attach Results]

26. Weather Conditions During Deployment Temp: 10.6 Wind: 6.9/NE ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 10 Wind: 19.6/NW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

28. Field Sampling Technician: Name(s) and Company (please print clearly)

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.32
9. Total Well Depth (fbgs) 70
10. Screened interval/open hole (fbgs) 60 - 70

18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2024-02-26
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
57.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/05/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 11.1 Wind: 11.5/SSW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 9.4 Wind: 8.1/SE ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/06/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 1.7 Wind: 20.7/WNW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 9.4 Wind: 4.6/NNW ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-275B
4. Well Permit Number: E201405043
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.48
9. Total Well Depth (fbgs) 45
10. Screened interval/open hole (fbgs) 35 - 45
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 02/28/24 Time: 09:31
15. Depth to Ground Water Depth to ground water at time of deployment: 4.5
16. Date and Time of Retrieval Date: 03/27/24 Time: 09:20
17. Depth to Ground Water Depth to ground water at time of retrieval: 3.59
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2024-02-28
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
37.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?

5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.38
9. Total Well Depth (fbgs) 20
10. Screened interval/open hole (fbgs) 10 - 20
11. Well Casing: Diameter: 4 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 4 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 02/27/24 Time: 10:02
15. Depth to Ground Water Depth to ground water at time of deployment: 9.16
16. Date and Time of Retrieval Date: 03/26/24 Time: 09:53
17. Depth to Ground Water Depth to ground water at time of retrieval: 9.25
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2024-02-27

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 04/10/15
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 6 Wind: 10.4/E ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 12.2 Wind: 12.7/NW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-373C
4. Well Permit Number: E201502843
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.37
9. Total Well Depth (fbgs) 118
10. Screened interval/open hole (fbgs) 108 - 118
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 03/05/24 Time: 10:42
15. Depth to Ground Water Depth to ground water at time of deployment: 39.36
16. Date and Time of Retrieval Date: 03/29/24 Time: 13:46
17. Depth to Ground Water Depth to ground water at time of retrieval: 37.7
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2024-03-05
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
115.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-377C
4. Well Permit Number: E201500787
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.35
9. Total Well Depth (fbgs) 118
10. Screened interval/open hole (fbgs) 108 - 118
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 03/05/24 Time: 10:14
15. Depth to Ground Water Depth to ground water at time of deployment: 47.2
16. Date and Time of Retrieval Date: 03/29/24 Time: 14:15
17. Depth to Ground Water Depth to ground water at time of retrieval: 44.05
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☐ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☒ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2024-03-05
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
110.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 04/09/15
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 6 Wind: 10.4/E ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 12.2 Wind: 12.7/NW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

Name	Company

Roche Groundwater Biennial Certification

Contaminants of Emerging Concern (CECs) Evaluation

2024

Attachment 8
Contaminants of Emerging Concern Evaluation

As part of the Ground Water Remedial Action Protectiveness / Biennial Certification Form, Roche has conducted an evaluation of contaminants of emerging concern (CECs), specifically 1,4-dioxane, perchlorate, per- and polyfluoroalkyl substances (PFAS), and 1,2,3-trichloropropane (1,2,3-TCP), as required to determine whether these compounds are contaminants of concern (COCs) within the former Hoffman-LaRoche Site (Site) associated with Ground Water Remedial Action Permit (RAP) #210001.

One of the CECs, 1,4-dioxane, is a COC being remediated under RAP #210001.

In accordance with applicable NJDEP guidance (NJDEP, 2019, 2021, 2021a), Roche conducted an evaluation of current and former operations and hazardous substance inventories to determine whether the other CECs were stored, handled, used, manufactured, disposed of, or discharged at the Site. NJDEP Guidance and relevant references used in the evaluation are cited below.

Based on the results of the evaluation, perchlorate and 1,2,3-TCP are not COCs at the Site; therefore, no further investigation of these CECs is warranted.

Roche evaluated operations at its former Nutley facility to determine whether PFAS should be considered a COC. That evaluation resulted in a focused groundwater sampling event for PFAS. Those samples revealed exceedances of the NJDEP's GWQS for PFNA, PFOS, and PFOA. The NJDEP Hotline was notified of these findings, and the NJDEP assigned Incident # 2021-10-14-1322-14 to the new case. Roche will conduct a RI of PFAS under that new number; Roche will perform the new RI and any RA required in accordance with the deadlines associated with the new case.
