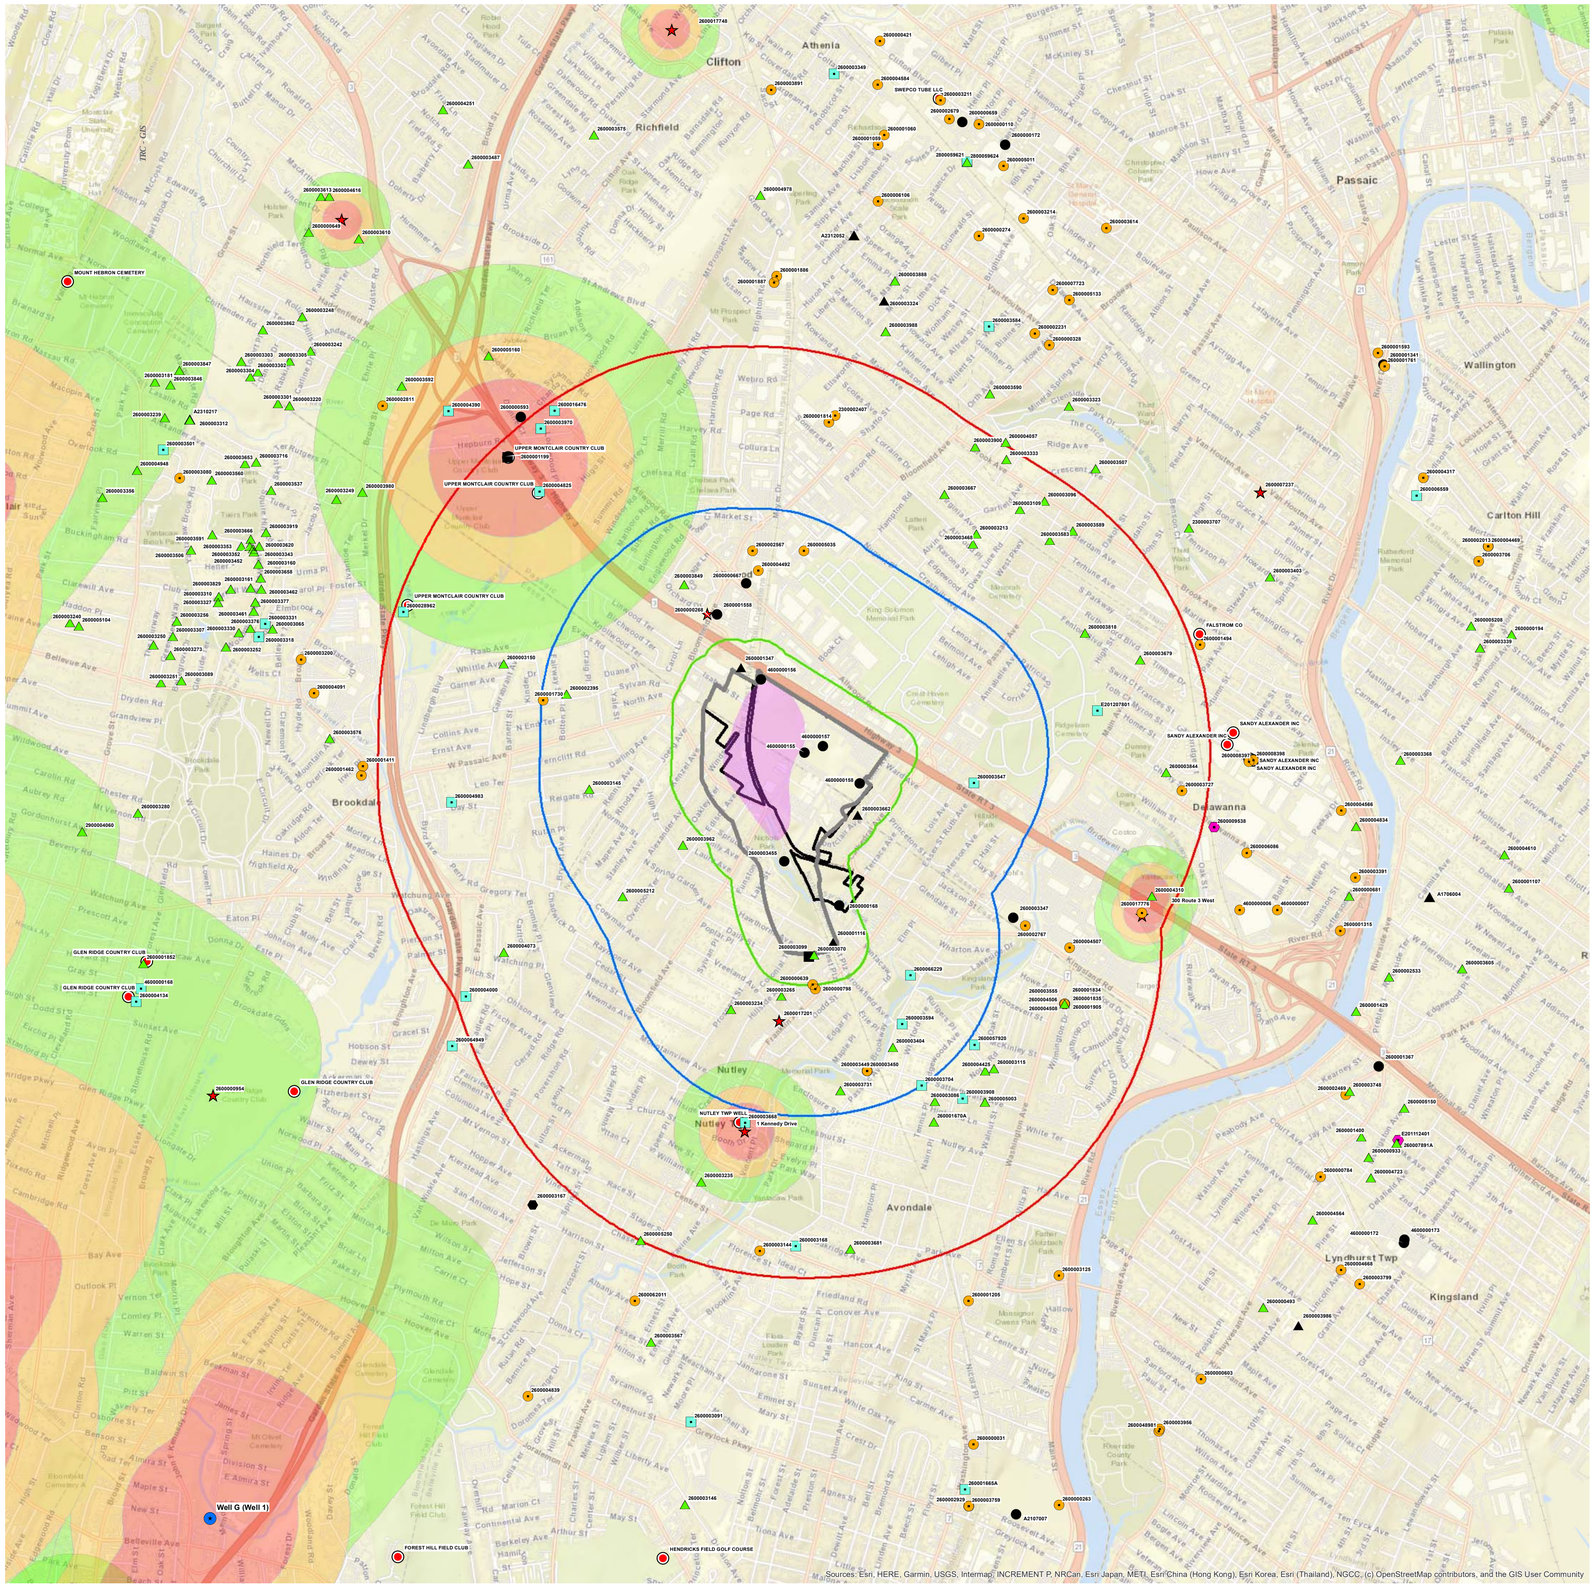
Roche Groundwater Biennial Certification

Updated Groundwater Well Search

September 2024



Legend

- Roche Nutley Site Boundary
- Extent of Remedial Action Plumes
- Extent of Monitored Plume Classification Exception Area
- Area Within 500 ft of Monitored Plumes
- Area Within 1/2 mile of Monitored Plumes
- Area Within 1 mile of Monitored Plumes

Well Use

- Domestic Well
- Sealed or Inactive Domestic Well
- Industrial Well
- Sealed or Inactive Industrial Well
- Irrigation Well
- Sealed or Inactive Irrigation Well
- Public Non-Community Well
- Non-Public Well
- Sealed or Inactive Non-Public Well
- Public Community Well
- Well with Water Allocation Permit

2600003962 Well Designation

Non-Community Wellhead Protection Areas

- Tier 1: 2-Year
- Tier 2: 5-Year
- Tier 3: 12-Year

Notes:

1) The Remedial Action Plumes include all areas of groundwater with concentrations above the NJDEP's GWQS associated with former operations at the Site (as defined by the November 8, 2021 Groundwater Remedial Action Report) during investigation of the site.

2) Monitored Plumes include all groundwater plumes that migrate onto the Site or are attributable to historical releases from breaches in the Clifton-Allwood Municipal Sewer, which was never used by Roche, as specified in the November 8, 2021 Groundwater Remedial Action Report.

3) Well designations provided are NJDEP Permit Numbers.

4) Listed well-use based on information available in NJDEP's database or information obtained by Roche during well search.

5) "Inactive" indicates well is no longer used but documentation that the well was sealed is not available.

6) Water allocation permits are required for water systems that use more than 100,000 gallons of ground water per day.

7) Public non-community water supply wells are wells that supply potable water for non-residential buildings such as factories, offices, etc.

ATTACHMENT 5

Roche Groundwater Biennial Certification

Groundwater Sampling Sheets

2019 – 2024

Attachment 5

Groundwater Sampling Sheets – 4Q 2019

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: 66RI-MW4
4. Well Permit Number: E201304931
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.3
9. Total Well Depth (fbgs) 15.4
10. Screened interval/open hole (fbgs) 8.4 - 15.4
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 12/16/19 Time: 12:00
15. Depth to Ground Water Depth to ground water at time of deployment: NM
16. Date and Time of Retrieval Date: 12/31/19 Time: 10:59
17. Depth to Ground Water Depth to ground water at time of retrieval: 2.45
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
7.75			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/18/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet

20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
114.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 03/07/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 12.8 Wind: 8.1/WSW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 10.0 Wind: 11.5/WSW ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-6B
4. Well Permit Number: E201218159
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.55
9. Total Well Depth (fbgs) 114.6
10. Screened interval/open hole (fbgs) 104.6 - 114.6
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/08/19 Time: 12:49
15. Depth to Ground Water Depth to ground water at time of deployment: 20.81
16. Date and Time of Retrieval Date: 12/05/19 Time: 10:40
17. Depth to Ground Water Depth to ground water at time of retrieval: 21.35
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
112.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 04/22/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 3.9 Wind: 19.6/NNW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 4.4 Wind: 18.4/W ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.43
9. Total Well Depth (fbgs) 345
10. Screened interval/open hole (fbgs) 335 - 345
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/06/19 Time: 09:30
15. Depth to Ground Water Depth to ground water at time of deployment: 24.8
16. Date and Time of Retrieval Date: 11/27/19 Time: 14:31
17. Depth to Ground Water Depth to ground water at time of retrieval: 25.16
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/40 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight In-line and Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
342.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/24/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 10.0 Wind: 10.4/WNW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 15.0 Wind: 9.2/S ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing

    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2019-11-25
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
134.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/24/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 11.7 Wind: 6.9/SSW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 6.1 Wind: 3.5/N ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-12B
4. Well Permit Number: E201300228
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.32
9. Total Well Depth (fbgs) 191
10. Screened interval/open hole (fbgs) 181 - 191
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/08/19 Time: 11:28
15. Depth to Ground Water Depth to ground water at time of deployment: 23.97
16. Date and Time of Retrieval Date: 12/04/19 Time: 13:56
17. Depth to Ground Water Depth to ground water at time of retrieval: 23.53
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
183.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 04/23/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 3.9 Wind: 21.9/NW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 3.3 Wind: 5.8/WSW ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
234.8			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/05/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 13.9 Wind: 6.9/SW ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 5.6 Wind: 3.5/W ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-24
4. Well Permit Number: E201314457
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.31
9. Total Well Depth (fbgs) 175
10. Screened interval/open hole (fbgs) 150 - 175
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/07/19 Time: 09:20
15. Depth to Ground Water Depth to ground water at time of deployment: 70.67
16. Date and Time of Retrieval Date: 11/27/19 Time: 12:51
17. Depth to Ground Water Depth to ground water at time of retrieval: 71.79
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/40 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight In-line and Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
172.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 12/11/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 9.4 Wind: 10.4/WSW ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 14.4 Wind: 9.2/S ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.43
9. Total Well Depth (fbgs) 565
10. Screened interval/open hole (fbgs) 545 - 565
11. Well Casing: Diameter: 4 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 4 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/06/19 Time: 15:26
15. Depth to Ground Water Depth to ground water at time of deployment: 29.55
16. Date and Time of Retrieval Date: 11/22/19 Time: 10:01
17. Depth to Ground Water Depth to ground water at time of retrieval: 29.46
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
557.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/17/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 12.2 Wind: 8.1/W ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 12.8 Wind: 6.9/SW ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing

    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
181.55			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/04/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 12.2 Wind: 8.1/NNW ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 7.8 Wind: 9.2/S ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-30B
4. Well Permit Number: E201315493
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.27
9. Total Well Depth (fbgs) 260
10. Screened interval/open hole (fbgs) 250 - 260
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/08/19 Time: 12:14
15. Depth to Ground Water Depth to ground water at time of deployment: 20.88
16. Date and Time of Retrieval Date: 12/05/19 Time: 08:21
17. Depth to Ground Water Depth to ground water at time of retrieval: 21.23
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
257.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 03/21/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 3.9 Wind: 21.9/NW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 3.9 Wind: 8.1/W ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.38

9. Total Well Depth (fbgs) 440
10. Screened interval/open hole (fbgs) 415 - 440
11. Well Casing: Diameter: 4 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 4 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/08/19 Time: 09:34
15. Depth to Ground Water Depth to ground water at time of deployment: 312.01
16. Date and Time of Retrieval Date: 11/23/19 Time: 15:26
17. Depth to Ground Water Depth to ground water at time of retrieval: 310.96
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
437.55			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 03/09/15
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 3.3 Wind: 20.7/NW ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 6.7 Wind: 5.8/S ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/40 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight In-line and Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
287.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 03/24/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 11.1 Wind: 11.5/WNW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 0.0 Wind: 6.9/N ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-34B
4. Well Permit Number: E201315235
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.38

9. Total Well Depth (fbgs) 300
10. Screened interval/open hole (fbgs) 275 - 300
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02

14. Date and Time of Deployment Date: 11/06/19 Time: 10:53
15. Depth to Ground Water Depth to ground water at time of deployment: 43.95
16. Date and Time of Retrieval Date: 12/13/19 Time: 07:08
17. Depth to Ground Water Depth to ground water at time of retrieval: 42.27
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/40 oz (stainless steel recommended)

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-38C
4. Well Permit Number: E201407795
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.18
9. Total Well Depth (fbgs) 550
10. Screened interval/open hole (fbgs) 525 - 550
11. Well Casing: Diameter: 4 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 4 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/07/19 Time: 14:47
15. Depth to Ground Water Depth to ground water at time of deployment: 76.34
16. Date and Time of Retrieval Date: 11/23/19 Time: 10:46
17. Depth to Ground Water Depth to ground water at time of retrieval: 76.95
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/40 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight In-line and Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
538.85			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/17/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.58
9. Total Well Depth (fbgs) 147
10. Screened interval/open hole (fbgs) 137 - 147
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/06/19 Time: 13:16
15. Depth to Ground Water Depth to ground water at time of deployment: 6.91
16. Date and Time of Retrieval Date: 11/27/19 Time: 09:36
17. Depth to Ground Water Depth to ground water at time of retrieval: 6.58
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
139.55			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/06/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]

18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
119.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/05/16
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 3.9 Wind: 16.1/NNW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-50C
4. Well Permit Number: E201413976
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.42
9. Total Well Depth (fbgs) 305
10. Screened interval/open hole (fbgs) 280 - 305
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/08/19 Time: 07:45
15. Depth to Ground Water Depth to ground water at time of deployment: 50.49
16. Date and Time of Retrieval Date: 12/05/19 Time: 07:56
17. Depth to Ground Water Depth to ground water at time of retrieval: 51.99
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
292.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 01/06/15
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.36
9. Total Well Depth (fbgs) 240
10. Screened interval/open hole (fbgs) 215 - 240
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/07/19 Time: 13:13

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-2
4. Well Permit Number: 2600011828
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.46
9. Total Well Depth (fbgs) 32.63
10. Screened interval/open hole (fbgs) 12.63 - 32.63
11. Well Casing: Diameter: 6 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 6 Material: ☐ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: N/A
14. Date and Time of Deployment Date: 12/10/19 Time: 10:08
15. Depth to Ground Water Depth to ground water at time of deployment: 6.17
16. Date and Time of Retrieval Date: 12/31/19 Time: 09:00
17. Depth to Ground Water Depth to ground water at time of retrieval: 6.55
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
21.25			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/01/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.36
9. Total Well Depth (fbgs) 44.2
10. Screened interval/open hole (fbgs) 24.2 - 44.2
11. Well Casing: Diameter: 6 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 6 Material: ☐ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: N/A
14. Date and Time of Deployment Date: 12/05/19 Time: 15:01
15. Depth to Ground Water Depth to ground water at time of deployment: 8.08
16. Date and Time of Retrieval Date: 12/31/19 Time: 07:53
17. Depth to Ground Water Depth to ground water at time of retrieval: 7.57
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
41.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: #Error
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet

20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
22.6			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 01/15/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 12.2 Wind: 10.4/S ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 9.4 Wind: 4.6/S ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-43
4. Well Permit Number: 2600054720
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.26
9. Total Well Depth (fbgs) 24.5
10. Screened interval/open hole (fbgs) 14.5 - 24.5
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/04/19 Time: 11:56
15. Depth to Ground Water Depth to ground water at time of deployment: 12.4
16. Date and Time of Retrieval Date: 11/26/19 Time: 09:51
17. Depth to Ground Water Depth to ground water at time of retrieval: 12.62
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-46
4. Well Permit Number: 2600060830
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.43
9. Total Well Depth (fbgs) 62
10. Screened interval/open hole (fbgs) 38 - 62
11. Well Casing: Diameter: 6 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 6 Material: ☐ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: N/A
14. Date and Time of Deployment Date: 11/08/19 Time: 11:46
15. Depth to Ground Water Depth to ground water at time of deployment: 48.82
16. Date and Time of Retrieval Date: 11/23/19 Time: 10:10
17. Depth to Ground Water Depth to ground water at time of retrieval: 49.68
18. Type of Deployment Line Used Diameter: 3/64" Material: Teflon Lined
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
59.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/30/04
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 3.9 Wind: 21.9/NW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 4.4 Wind: 9.2/NNW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/01/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 12.8 Wind: 12.7/S ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 6.1 Wind: 13.8/NW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-105B
4. Well Permit Number: P200804399
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.41

9. Total Well Depth (fbgs) 40
10. Screened interval/open hole (fbgs) 30 - 40
11. Well Casing: Diameter: 6 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 6 Material: ☐ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: N/A

14. Date and Time of Deployment Date: 11/04/19 Time: 15:27
15. Depth to Ground Water Depth to ground water at time of deployment: 1.98
16. Date and Time of Retrieval Date: 12/05/19 Time: 14:06
17. Depth to Ground Water Depth to ground water at time of retrieval: 2.09
18. Type of Deployment Line Used Diameter: 3/64" Material: Teflon Lined

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)

20. Type of PDBS Used
   ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
   ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)

21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____

22. Position of PDBS Weight Bottom of line-suspended

23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
36.75			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/05/16

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well

7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.43

9. Total Well Depth (fbgs) 12
10. Screened interval/open hole (fbgs) 7 - 12
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01

14. Date and Time of Deployment Date: 11/04/19 Time: 15:02
15. Depth to Ground Water Depth to ground water at time of deployment: 4.24
16. Date and Time of Retrieval Date: 12/05/19 Time: 13:21
17. Depth to Ground Water Depth to ground water at time of retrieval: 4.29
18. Type of Deployment Line Used Diameter: 3/64" Material: Teflon Lined

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)

20. Type of PDBS Used
   ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
   ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)

21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____

22. Position of PDBS Weight Bottom of line-suspended

23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
8.65			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/18/13

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____
   Measurements taken every _____ feet
   [Please Attach Results]

26. Weather Conditions During Deployment Temp: 13.3 Wind: 12.7/S ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 6.1 Wind: 13.8/NW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing

20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
77.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/18/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 3.9 Wind: 21.9/NW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 5.6 Wind: 0.0/N ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-126
4. Well Permit Number: E201012851
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.36
9. Total Well Depth (fbgs) 15
10. Screened interval/open hole (fbgs) 5 - 15
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 11/04/19 Time: 13:22
15. Depth to Ground Water Depth to ground water at time of deployment: 6.1
16. Date and Time of Retrieval Date: 11/27/19 Time: 09:21
17. Depth to Ground Water Depth to ground water at time of retrieval: 6.15
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
9.25			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/18/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 13.3 Wind: 11.5/S ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 9.4 Wind: 3.5/S ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/08/15
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 3.9 Wind: 8.1/W ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 5.0 Wind: 3.5/N ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-136C
4. Well Permit Number: E201415879
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.37
9. Total Well Depth (fbgs) 100
10. Screened interval/open hole (fbgs) 90 - 100
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 12/05/19 Time: 09:10
15. Depth to Ground Water Depth to ground water at time of deployment: 12.52
16. Date and Time of Retrieval Date: 12/31/19 Time: 09:38
17. Depth to Ground Water Depth to ground water at time of retrieval: 11.99
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2019-12-05
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
95.75			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.32
9. Total Well Depth (fbgs) 16.4
10. Screened interval/open hole (fbgs) 6.4 - 16.4
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.006
14. Date and Time of Deployment Date: 11/04/19 Time: 16:05
15. Depth to Ground Water Depth to ground water at time of deployment: 5.88
16. Date and Time of Retrieval Date: 12/05/19 Time: 14:31
17. Depth to Ground Water Depth to ground water at time of retrieval: 5.89
18. Type of Deployment Line Used Diameter: 3/64" Material: Teflon Lined
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
14.25			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/19/12
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]

16. Date and Time of Retrieval Date: 11/27/19 Time: 12:30
17. Depth to Ground Water Depth to ground water at time of retrieval: 32.72
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
54.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/30/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 12.2 Wind: 9.2/SW ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 14.4 Wind: 9.2/S ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing

6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.58

9. Total Well Depth (fbgs) 80
10. Screened interval/open hole (fbgs) 60 - 80
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02

14. Date and Time of Deployment Date: 11/07/19 Time: 11:31

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-170AR
4. Well Permit Number: E201510908
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.35
9. Total Well Depth (fbgs) 17
10. Screened interval/open hole (fbgs) 7 - 17
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 12/05/19 Time: 09:45
15. Depth to Ground Water Depth to ground water at time of deployment: 12.95
16. Date and Time of Retrieval Date: 12/30/19 Time: 12:35
17. Depth to Ground Water Depth to ground water at time of retrieval: 12.91
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
16			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: #Error

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.34
9. Total Well Depth (fbgs) 50
10. Screened interval/open hole (fbgs) 40 - 50
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 11/07/19 Time: 10:24
15. Depth to Ground Water Depth to ground water at time of deployment: 15.15
16. Date and Time of Retrieval Date: 11/21/19 Time: 14:00
17. Depth to Ground Water Depth to ground water at time of retrieval: 15.57
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
47.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/30/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 11.1 Wind: 11.5/SW ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 12.2 Wind: 5.8/WSW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
22.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/18/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 10.0 Wind: 10.4/WNW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 14.4 Wind: 9.2/S ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-206B
4. Well Permit Number: E201304512
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.2
9. Total Well Depth (fbgs) 51.5
10. Screened interval/open hole (fbgs) 41.5 - 51.5
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/05/19 Time: 10:53
15. Depth to Ground Water Depth to ground water at time of deployment: 3
16. Date and Time of Retrieval Date: 12/04/19 Time: 10:07
17. Depth to Ground Water Depth to ground water at time of retrieval: 3.12
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
47.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/18/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 13.9 Wind: 3.5/SSE ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 2.2 Wind: 5.8/SW ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/04/19 Time: 12:18
15. Depth to Ground Water Depth to ground water at time of deployment: 7.15
16. Date and Time of Retrieval Date: 11/27/19 Time: 07:59
17. Depth to Ground Water Depth to ground water at time of retrieval: 7.66
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
45.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/17/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 12.2 Wind: 10.4/S ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 6.7 Wind: 3.5/N ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/01/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 15.0 Wind: 10.4/SW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 11.7 Wind: 4.6/N ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-209B
4. Well Permit Number: E201306460
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.42
9. Total Well Depth (fbgs) 40
10. Screened interval/open hole (fbgs) 30 - 40
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 11/05/19 Time: 15:40
15. Depth to Ground Water Depth to ground water at time of deployment: 4.21
16. Date and Time of Retrieval Date: 11/27/19 Time: 10:33
17. Depth to Ground Water Depth to ground water at time of retrieval: 4.35
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
37.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/01/13

6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.37
9. Total Well Depth (fbgs) 50
10. Screened interval/open hole (fbgs) 40 - 50
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 11/06/19 Time: 11:16
15. Depth to Ground Water Depth to ground water at time of deployment: 27.97
16. Date and Time of Retrieval Date: 11/27/19 Time: 11:33
17. Depth to Ground Water Depth to ground water at time of retrieval: 28.5
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
47.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/02/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]

18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
67.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/01/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 11.7 Wind: 3.5/N ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-222C
4. Well Permit Number: E201311482
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.37
9. Total Well Depth (fbgs) 257
10. Screened interval/open hole (fbgs) 247 - 257
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 11/07/19 Time: 09:48
15. Depth to Ground Water Depth to ground water at time of deployment: 30.63
16. Date and Time of Retrieval Date: 12/04/19 Time: 12:15
17. Depth to Ground Water Depth to ground water at time of retrieval: 31.68
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
254.5			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 11/12/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.55

9. Total Well Depth (fbgs) 30
10. Screened interval/open hole (fbgs) 20 - 30
11. Well Casing: Diameter: 6 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 6 Material: ☐ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: N/A

14. Date and Time of Deployment Date: 11/04/19 Time: 07:52
15. Depth to Ground Water Depth to ground water at time of deployment: 17.88
16. Date and Time of Retrieval Date: 11/23/19 Time: 16:01
17. Depth to Ground Water Depth to ground water at time of retrieval: 19.59
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)

20. Type of PDBS Used
   ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
   ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)

21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____

22. Position of PDBS Weight Bottom of line-suspended

23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
28.25			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 12/20/13

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____
   Measurements taken every _____ feet
   [Please Attach Results]

26. Weather Conditions During Deployment Temp: 5.0 Wind: 0.0/N ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 6.7 Wind: 5.8/S ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
17.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/06/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 8.3 Wind: 0.0/N ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 4.4 Wind: 18.4/W ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-258C
4. Well Permit Number: E201314458
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.32

9. Total Well Depth (fbgs) 130
10. Screened interval/open hole (fbgs) 105 - 130
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02

14. Date and Time of Deployment Date: 11/07/19 Time: 09:18
15. Depth to Ground Water Depth to ground water at time of deployment: 62.09
16. Date and Time of Retrieval Date: 11/27/19 Time: 12:56
17. Depth to Ground Water Depth to ground water at time of retrieval: 63.48
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)

20. Type of PDBS Used
   ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
   ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)

21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____

22. Position of PDBS Weight Bottom of line-suspended

23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
107.5			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 12/11/13

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____
   Measurements taken every _____ feet
   [Please Attach Results]

26. Weather Conditions During Deployment Temp: 9.4 Wind: 10.4/WSW ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 14.4 Wind: 9.2/S ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing

28. Field Sampling Technician: Name(s) and Company (please print clearly)

9. Total Well Depth (fbgs) 70
10. Screened interval/open hole (fbgs) 60 - 70
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/04/19 Time: 07:39
15. Depth to Ground Water Depth to ground water at time of deployment: 3.55
16. Date and Time of Retrieval Date: 12/04/19 Time: 11:05
17. Depth to Ground Water Depth to ground water at time of retrieval: 3.97
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
62.7			
5th PDBS	**6th PDBS**	**7th PDBS**	**8th PDBS**

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 03/21/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 5.0 Wind: 0.0/N ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
60.25			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/06/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 13.3 Wind: 12.7/S ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 7.8 Wind: 4.6/WNW ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-270A
4. Well Permit Number: E201401596
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.33
9. Total Well Depth (fbgs) 62
10. Screened interval/open hole (fbgs) 52 - 62
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/04/19 Time: 14:25
15. Depth to Ground Water Depth to ground water at time of deployment: 56.76
16. Date and Time of Retrieval Date: 11/25/19 Time: 08:50
17. Depth to Ground Water Depth to ground water at time of retrieval: 57.23
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS

5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.37
9. Total Well Depth (fbgs) 14
10. Screened interval/open hole (fbgs) 4 - 14
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/04/19 Time: 14:39
15. Depth to Ground Water Depth to ground water at time of deployment: 5.02
16. Date and Time of Retrieval Date: 11/27/19 Time: 09:12
17. Depth to Ground Water Depth to ground water at time of retrieval: 5.3
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
7.75			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/06/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]

18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
72.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 06/06/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 9.4 Wind: 13.8/SSW ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 9.4 Wind: 5.8/S ☐ Sunny ☒ Overcast ☐ Raining ☐ Snowing

6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.31

9. Total Well Depth (fbgs) 30
10. Screened interval/open hole (fbgs) 20 - 30
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-287AR
4. Well Permit Number: E201902995
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☒ Stick Up ☐ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) -0.33
9. Total Well Depth (fbgs) 10.9
10. Screened interval/open hole (fbgs) 2.9 - 10.9
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 11/05/19 Time: 11:10
15. Depth to Ground Water Depth to ground water at time of deployment: 8.86
16. Date and Time of Retrieval Date: 12/04/19 Time: 10:21
17. Depth to Ground Water Depth to ground water at time of retrieval: 8.76
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
11.45			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: #Error
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.39
9. Total Well Depth (fbgs) 50
10. Screened interval/open hole (fbgs) 30 - 50
11. Well Casing: Diameter: 4 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 4 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel

20. Type of PDBS Used
   ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
   ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)

21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____

22. Position of PDBS Weight Bottom of line-suspended

23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
72.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/08/14

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____
   Measurements taken every _____ feet
   [Please Attach Results]

26. Weather Conditions During Deployment Temp: 11.7 Wind: 11.5/SSW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 7.8 Wind: 0.0/N ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing

28. Field Sampling Technician: Name(s) and Company (please print clearly)

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-347C
4. Well Permit Number: E201407736
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.34

9. Total Well Depth (fbgs) 80
10. Screened interval/open hole (fbgs) 70 - 80
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-349B
4. Well Permit Number: E201408235
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.41
9. Total Well Depth (fbgs) 60
10. Screened interval/open hole (fbgs) 40 - 60
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/06/19 Time: 13:04
15. Depth to Ground Water Depth to ground water at time of deployment: 5.4
16. Date and Time of Retrieval Date: 11/27/19 Time: 08:57
17. Depth to Ground Water Depth to ground water at time of retrieval: 5.72
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
42.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/08/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 11.7 Wind: 3.5/N ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 7.8 Wind: 0.0/N ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 04/10/15

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____
   Measurements taken every _____ feet
   [Please Attach Results]

26. Weather Conditions During Deployment Temp: 12.8 Wind: 15.0/SW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 7.2 Wind: 5.8/W ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

28. Field Sampling Technician: Name(s) and Company (please print clearly)

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-374C
4. Well Permit Number: E201502845
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.39
9. Total Well Depth (fbgs) 107
10. Screened interval/open hole (fbgs) 97 - 107
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/07/19 Time: 13:08
15. Depth to Ground Water Depth to ground water at time of deployment: 43.71
16. Date and Time of Retrieval Date: 11/25/19 Time: 09:51
17. Depth to Ground Water Depth to ground water at time of retrieval: 44.2
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS

6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.38
9. Total Well Depth (fbgs) 135
10. Screened interval/open hole (fbgs) 115 - 135
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/04/19 Time: 09:00
15. Depth to Ground Water Depth to ground water at time of deployment: 43.64
16. Date and Time of Retrieval Date: 11/23/19 Time: 14:05
17. Depth to Ground Water Depth to ground water at time of retrieval: 45.93
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
127.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 04/08/15
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]

16. Date and Time of Retrieval Date: 11/25/19 Time: 10:46
17. Depth to Ground Water Depth to ground water at time of retrieval: 50.59
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)

20. Type of PDBS Used
   ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
   ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)

21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____

22. Position of PDBS Weight Bottom of line-suspended

23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
99.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 04/09/15

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____
   Measurements taken every _____ feet
   [Please Attach Results]

26. Weather Conditions During Deployment Temp: 3.9 Wind: 21.9/NW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 10.6 Wind: 5.8/N ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/01/15
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 3.3 Wind: 20.7/NW ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 3.3 Wind: 10.4/SW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-416A
4. Well Permit Number: E201501198
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.47
9. Total Well Depth (fbgs) 38
10. Screened interval/open hole (fbgs) 19 - 38
11. Well Casing: Diameter: 6 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 6 Material: ☐ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: N/A
14. Date and Time of Deployment Date: 11/04/19 Time: 10:18
15. Depth to Ground Water Depth to ground water at time of deployment: 8.05
16. Date and Time of Retrieval Date: 12/04/19 Time: 15:31
17. Depth to Ground Water Depth to ground water at time of retrieval: 8.38
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
35.55			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/01/15

7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.32
9. Total Well Depth (fbgs) 20
10. Screened interval/open hole (fbgs) 10 - 20
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/07/19 Time: 07:46
15. Depth to Ground Water Depth to ground water at time of deployment: 4.53
16. Date and Time of Retrieval Date: 11/26/19 Time: 09:13
17. Depth to Ground Water Depth to ground water at time of retrieval: 4.45
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
18.25			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: #Error
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-475A
4. Well Permit Number: E201508355
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.32
9. Total Well Depth (fbgs) 20
10. Screened interval/open hole (fbgs) 10 - 20
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/04/19 Time: 15:53
15. Depth to Ground Water Depth to ground water at time of deployment: 7.09
16. Date and Time of Retrieval Date: 11/26/19 Time: 07:20
17. Depth to Ground Water Depth to ground water at time of retrieval: 7.16
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
13.25			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: #Error
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 12.8 Wind: 12.7/S ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 2.2 Wind: 0.0/N ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-480A
4. Well Permit Number: E201510871
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.35
9. Total Well Depth (fbgs) 22
10. Screened interval/open hole (fbgs) 10 - 22
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/05/19 Time: 13:35
15. Depth to Ground Water Depth to ground water at time of deployment: 6.21
16. Date and Time of Retrieval Date: 11/27/19 Time: 07:30
17. Depth to Ground Water Depth to ground water at time of retrieval: 6.36
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
13.25			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: #Error
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 15.0 Wind: 8.1/WSW ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 6.7 Wind: 3.5/N ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: MW-485A
4. Well Permit Number: E201511647
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.34
9. Total Well Depth (fbgs) 20
10. Screened interval/open hole (fbgs) 10 - 20
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 11/04/19 Time: 15:55
15. Depth to Ground Water Depth to ground water at time of deployment: 3.08
16. Date and Time of Retrieval Date: 11/26/19 Time: 08:11
17. Depth to Ground Water Depth to ground water at time of retrieval: 2.84
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled _____
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
13.25			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.46
9. Total Well Depth (fbgs) 10
10. Screened interval/open hole (fbgs) 3 - 10

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: 66RI-MW4
4. Well Permit Number: E201304931
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.3
9. Total Well Depth (fbgs) 15.4
10. Screened interval/open hole (fbgs) 8.4 - 15.4
11. Well Casing: Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☒ PVC ☐ Carbon Steel ☐ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.01
14. Date and Time of Deployment Date: 09/29/20 Time: 09:30
15. Depth to Ground Water Depth to ground water at time of deployment: 12
16. Date and Time of Retrieval Date: 10/19/20 Time: 09:22
17. Depth to Ground Water Depth to ground water at time of retrieval: 11.41
18. Type of Deployment Line Used Diameter: 3/16" Material: Polypropylene
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/8 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2020-09-29
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
7.25			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 09/18/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 21.7 Wind: 6.9/S ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 14.4 Wind: 3.5/N ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

9. Total Well Depth (fbgs) 136
10. Screened interval/open hole (fbgs) 126 - 136
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02

14. Date and Time of Deployment Date: 09/28/20 Time: 12:50
15. Depth to Ground Water Depth to ground water at time of deployment: 61.36
16. Date and Time of Retrieval Date: 10/13/20 Time: 15:07
17. Depth to Ground Water Depth to ground water at time of retrieval: 60.72
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)

20. Type of PDBS Used
   ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
   ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)

21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2020-09-28

22. Position of PDBS Weight Bottom of line-suspended

23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
134.25			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 05/21/13

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____
   Measurements taken every _____ feet
   [Please Attach Results]

26. Weather Conditions During Deployment Temp: 23.9 Wind: 10.4/SSE ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 14.4 Wind: 9.2/NW ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing

    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2020-09-30
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
287.05			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 10/03/14
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 15.6 Wind: 12.7/WSW ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 17.2 Wind: 6.9/SW ☒ Sunny ☐ Overcast ☐ Raining ☐ Snowing

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-6C
4. Well Permit Number: E201218160
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____
8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.6
9. Total Well Depth (fbgs) 291
10. Screened interval/open hole (fbgs) 281 - 291
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 10/01/20 Time: 12:10
15. Depth to Ground Water Depth to ground water at time of deployment: 22.32
16. Date and Time of Retrieval Date: 10/20/20 Time: 08:50
17. Depth to Ground Water Depth to ground water at time of retrieval: 21.6
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2020-10-01
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
288			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 04/22/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) 0.43

9. Total Well Depth (fbgs) 345
10. Screened interval/open hole (fbgs) 335 - 345
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02

14. Date and Time of Deployment Date: 10/01/20 Time: 09:40
15. Depth to Ground Water Depth to ground water at time of deployment: 26.11
16. Date and Time of Retrieval Date: 10/15/20 Time: 12:40
17. Depth to Ground Water Depth to ground water at time of retrieval: 25.75
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel

19. Material and Mass (oz.) of PDBS Weight Stainless Steel/40 oz (stainless steel recommended)

20. Type of PDBS Used
   ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
   ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)

21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2020-10-01

22. Position of PDBS Weight In-line and Bottom of line-suspended

23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
343.25			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
   ☐ **No**, this well is being profiled during this sampling round
   ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/24/13

25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
   ☒ **No**, flow testing has not been conducted in this well
   ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
   Type of flow meter used: _____
   Measurements taken every _____ feet
   [Please Attach Results]

14. Date and Time of Deployment Date: 09/28/20 Time: 09:58
15. Depth to Ground Water Depth to ground water at time of deployment: 25.57
16. Date and Time of Retrieval Date: 10/13/20 Time: 11:18
17. Depth to Ground Water Depth to ground water at time of retrieval: 24.7
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2020-09-28
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
190.25			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/05/13
25. If the saturated portion of the well screen or open hole is greater than 10 feet, has the well been flow tested to assess the potential for vertical flow to be present within the well?
    ☒ **No**, flow testing has not been conducted in this well
    ☐ **Yes**, flow testing of this well was conducted. Date of testing: _____
    Type of flow meter used: _____
    Measurements taken every _____ feet
    [Please Attach Results]
26. Weather Conditions During Deployment Temp: 21.7 Wind: 8.1/S ☐ Sunny ☐ Overcast ☐ Raining ☐ Snowing
27. Weather Conditions During Retrieval Temp: 13.3 Wind: 9.2/N ☐ Sunny ☐ Overcast ☒ Raining ☐ Snowing
28. Field Sampling Technician: Name(s) and Company (please print clearly)

New Jersey Department of Environmental Protection
Checklist for the Submission of Sampling Data for Passive Diffusion Bag Samplers (PDBS)

1. Site: Former Hoffmann-La Roche Inc. Facility - Nutley, New Jersey
2. Location: Nutley, NJ
3. Well Designation: DW-8C
4. Well Permit Number: E201217463
5. Type of Well: ☐ Monitoring ☐ Extraction ☐ Residential ☐ Public Supply ☐ Irrigation ☒ Other
6. Well Surface Finish: ☐ Stick Up ☒ Flush Mount
7. Location of Measuring Point: ☒ Top of Casing ☐ Other (specify) _____

8. **NOTE:** PDBS represent a point sample within the screened interval or open hole of the well. It is critical to know the exact depth within the well where the PDBS is deployed. Well construction specifications, which are typically used to determine where to set the PD BS in the well, are measured in feet below ground surface (fbgs). If the depth interval for PDBS deployment is measured from the reference point identified above, the difference between this reference point and the ground surface must be measured and accounted for to determine the proper depth interval to set the PDBS. Please identify below, any differences between the measuring point identified above and actual ground surface at the well head.

   Distance between measuring point and ground surface (ft.) -6.5

9. Total Well Depth (fbgs) 307
10. Screened interval/open hole (fbgs) 297 - 307
11. Well Casing: Diameter: 2 Material: ☐ PVC ☒ Carbon Steel ☐ Stainless Steel
12. Well Screen (or open hole diameter): Diameter: 2 Material: ☐ PVC ☐ Carbon Steel ☒ Stainless Steel
13. Screen Size (slot) Screen Slot Size: 0.02
14. Date and Time of Deployment Date: 09/28/20 Time: 09:45
15. Depth to Ground Water Depth to ground water at time of deployment: 27.01
16. Date and Time of Retrieval Date: 10/13/20 Time: 11:38
17. Depth to Ground Water Depth to ground water at time of retrieval: 25.33
18. Type of Deployment Line Used Diameter: 3/64" Material: Stainless steel
19. Material and Mass (oz.) of PDBS Weight Stainless Steel/20 oz (stainless steel recommended)
20. Type of PDBS Used
    ☒ Lab Filled (Modified Trip Blank must be taken at time of deployment)
    ☐ Field Filled (Modified equipment blank of fill water must be taken at time of deployment. If PDBS isn't filled at well head, blank must travel with samplers until last sampler is deployed. Blank is then taken.)
21. Dimensions of PDBS Length (in.) 18 Diameter: 1.75 Filled 2020-09-28
22. Position of PDBS Weight Bottom of line-suspended
23. Position of PDBS in Well Screen (ft. from measuring point to center of PDBS)

1st PDBS	2nd PDBS	3rd PDBS	4th PDBS
304			

5th PDBS	6th PDBS	7th PDBS	8th PDBS

24. If the saturated portion of the well screen or open hole is greater than 5 feet, has the well been vertically profiled to assess the potential for contaminant stratification?
    ☐ **No**, this well is being profiled during this sampling round
    ☒ **Yes**, this well was profiled already. Date when well was profiled: 07/05/13
