

Roche Report to the Community

Roche has used proven, effective and pioneering technologies to clean up the former Roche Nutley site quickly and safely. We are proud to watch exceptional organizations making the ON3 campus their home as we continue to work closely with the New Jersey Department of Environmental Protection (NJDEP) to ensure a comprehensive remediation of the property, building on the extensive work that has already been completed.

Update on the Environmental Remediation: November 20, 2020 - May 20, 2021

Over the past six months, Roche:

- Submitted *MW-28 LNAPL* (light non-aqueous phase liquid) *IRM* (interim remedial measure) *Report* on December 3, 2020.
- Conducted groundwater monitoring as specified in the NJDEP-approved December 2019 *Groundwater Remedial Action Work Plan* (RAWP).
- Repaired wells within on-site redevelopment areas and closed wells no longer needed for groundwater monitoring, in accordance with regulatory guidelines.
- Continued to make information and reports available on the Roche-Nutley website (www.roke-nutley.com).

Over the next six months, Roche plans to:

- Initiate the remedial action for the Windsor Place Sewer Plume.
- Submit an annual *Site-Wide Groundwater Progress Report*.
- Submit a *Remedial Action Report* (RAR) and *Remedial Action Permit* (RAP) application for site-wide groundwater and a *Receptor Evaluation Update Report*.
- Issue a *Response Action Outcome* for site-wide groundwater following NJDEP approval of the RAP application.
- Prepare a *Remedial Investigation Report* (RIR), RAWP and RAR for MW-28 LNAPL area.
- Continue to monitor groundwater in accordance with the RAWP.
- Close wells not needed for long-term monitoring, in accordance with regulatory guidelines.
- Continue to make information and reports available on the website (www.roke-nutley.com), including the schedule for off-site groundwater sampling.
